Surviving Entity and Date
2026/10/28 Westchester Medical Center

Date Received

10/28/2026

Closing Date

12/4/2026

Overview

A New York State-based healthcare system is acquiring several primary care and specialty practice office locations and healthcare providers from a Seller that is ceasing services.

Transaction Summary

The proposed transaction is an asset acquisition under which Westchester Medical Center and certain of its affiliates ("WMC" or "Buyer") will acquire assets of Optum Medical Care, P.C. and certain of its affiliates ("Optum" or "Seller") at locations where the Seller intends to cease providing services. Buyer will assume certain liabilities of Seller related to the Buyer's operations. Buyer will hire Seller's staff and will begin business operations at these office locations post-closing. As a result of the transaction, Buyer expects to employ approximately 25 physicians, 11 advanced practice providers, and 84 other staff members who are currently employed by Optum. These clinicians and staff will continue to provide or support primary care, specialty care, behavioral health, radiology, oncology, and physical medicine and rehabilitation and pain management services.

Westchester Medical Center ("WMC") is a New York State-based healthcare system focused in the Hudson Valley area. WMC operates 8 main campuses in New York State. They operate across numerous healthcare settings and service types, including hospitals, birth centers, burn care, cancer care, emergency care, lab services, mental health services, and a diverse set of specialty care.

Optum Medical Care ("Optum") is a United States-based healthcare system with over 1,700 clinical sites and 390,000 in-network providers, having served approximately 95 million individuals nationally. They provide several modes of healthcare delivery, including primary and specialty care clinics, virtual care, and urgent facilities.
