Overview

Lenox Hill medical group is buying assets and employing physicians, advanced practice providers, and support staff from Optum PC, an affiliate of UnitedHealth Group Incorporated.

Transaction Summary

Lenox Hill Faculty Medical Affiliates, University Faculty Practice Corporation ("Lenox Hill" or the "Purchaser") is an affiliate of Northwell Health, Inc. ("Northwell"), a New York not-for-profit corporation headquartered in New Hyde Park, New York. Optum Medical Care, P.C., f/k/a CareMount Medical, P.C. ("Optum PC"), together with CareMount Health Solutions, LLC., and ProHEALTH Medical Management, LLC (collectively, the "Sellers"), are affiliates of UnitedHealth Group Incorporated and operate a network of multi-specialty physician practices including the CareMount Medical and ProHEALTH physician practice brands at sites located across New York State. Lenox Hill and the Sellers entered into an asset purchase agreement, which Northwell also signed as a limited capacity as performance and payment guarantor.

Under the agreement, Lenox Hill will acquire or acquire select assets of the Sellers' multi-specialty physician practices and ultimately employ up to 87 physicians and 87 advanced practice providers currently employed by Sellers, together with associated support staff.

The Sellers' practices employ physicians and advanced practice providers across a wide range of specialties, including Primary Care, Cardiology, Gastroenterology, Hospital medicine, and serve patients in the New York City metropolitan area, Long Island, and the Hudson Valley, including in Nassau, Suffolk, Westchester, Dutchess, and Ulster counties. In connection with the transaction, Optum PC and Northwell (on behalf of itself and its affiliates) will also enter into a Clinical Collaboration and Care Coordination Agreement establishing a framework for ongoing clinical collaboration and care coordination between them in the applicable markets.

The parties state that the transaction is structured to promote continuity of care for existing patients and to maintain access to multi-specialty physician services at the current practice locations.
